

ECONOMIC ANALYSIS PROJECT

Professors Greg Niemesh and Jenny Minier will direct a 1-credit independent study program in spring 2023. You'll be part of a small team providing a cost-benefit analysis of the services funded by a grant from the U.S. Department of Health and Human Services that aimed to address challenges relating to prevention, treatment, and recovery services for substance use and mental health disorders in Oxford. Miami University is part of the consortium that received the grant.

No experience necessary - you'll learn about (1) data collection, cleaning, and simple analysis; (2) data visualization and interpretation; (3) writing for a non-technical audience; and (4) policy analysis. In addition to meeting weekly with Professors Niemesh and Minier, you'll meet with the clients and representatives from the other members of the consortium.

Prerequisites: successful completion of ECO 201 and 202, and availability on Tuesdays 2:50-3:50 during spring semester.

ECO 377 Independent Study

Cost-benefit analysis of
a grant supporting
addiction and mental
health services in
Butler County

Spring 2023

Tuesdays
2:50-3:50 p.m.
